

*Implementation of the Shared Environmental
Information System (SEIS) principles and practices
in the Eastern Partnership countries*

Conclusions and way ahead

Discussions by participants

Summary of upcoming activities and milestones in 2017

- Policy and Governance – e.g. Letters of Intent/registration, National Implementation Team (NIT), National Assistant, communication approach, upcoming key meetings, coordination with other relevant projects, identifying opportunities for other meetings
- Regional/common activities – Indicators/environmental accounting, environmental assessments, portal/platforms,
- National priorities – EEA digest inputs and identify manageable components for each country

Aspects to be further considered

- Specific targets for measuring SEIS and of the project
- SDGs as overarching concept underpinning the further work on indicators
- Interface/links with other regional projects (EUWI+, EaP Green, EMBLAS II) and global processes (GEO)
- Identify concrete examples of national practices/pilots to be replicated
