European Environment Agency

# Air quality

Air

- Key objective to **increase the use and public accessibility of air quality data** in the Eastern Partnership countries
- Assessing the state of air quality monitoring & reporting through regional workshops and country visits during 2018-2020
- Development of country fact sheets on AQ monitoring & reporting
- Development of graphic user interphase (GUI) for RAVEN+ application for potential inclusion of the partner countries in the Air Quality Index: <https://www.eea.europa.eu/themes/air/air-quality-index>

- Support the biogeographical seminars for sufficiency assessment on proposed and candidate sites - **total area of Emerald sites increased by 35%** from 2016 to 2019: <https://www.coe.int/en/web/bern-convention/emerald-network-reference-portal>

- Support **developing regionally comparable biodiversity indicator** on Nationally designated protected areas (D1-UNECE and SEBI 007-EEA)

- Improving capacities of the countries in data harmonisation and reporting** under Resolution No. 8(2012) of the Bern Convention (in 2018 and 2019)

# Water area

Water

- Harmonisation of the national water data with the **Water Information System for Europe (WISE)**
- Support the **implementation of selected water indicators** line with the EEA indicator methodology and template for **regional comparability** and **knowledge-based policy-making**
  - A regional overview being produced based on the indicators
- Support **pilot activities** to strengthen the implementation of the SEIS principles

Water accounts in Azerbaijan and Belarus

Support to development of Water Information System in Georgia and Ecoportals in Armenia and Azerbaijan

## C2 – Freshwater abstraction in Georgia

Oct 31, 2019

Georgia is non-water-stressed country with a water exploitation index (WEI) of around 4 % in 2015.

More than 50 % of the annual total water abstraction is accounted for by agriculture, which is the main pressure on renewable water resources.

[Read more](#)

## C2 – Freshwater abstraction in the Republic of Armenia

Oct 31, 2019

Armenia is not a water-scarce country; however, it faces severe water stress conditions, with an annual water exploitation index (WEI) of greater than 40 % (WEI 61.4 % in 2017), due to high demands for public water supply (61 %) and for agriculture (34 %). Total water abstraction for both sectors accounted for 95 % of annual total freshwater abstraction of the country in 2017.

# Waste data and statistics (2016-2017)

Waste

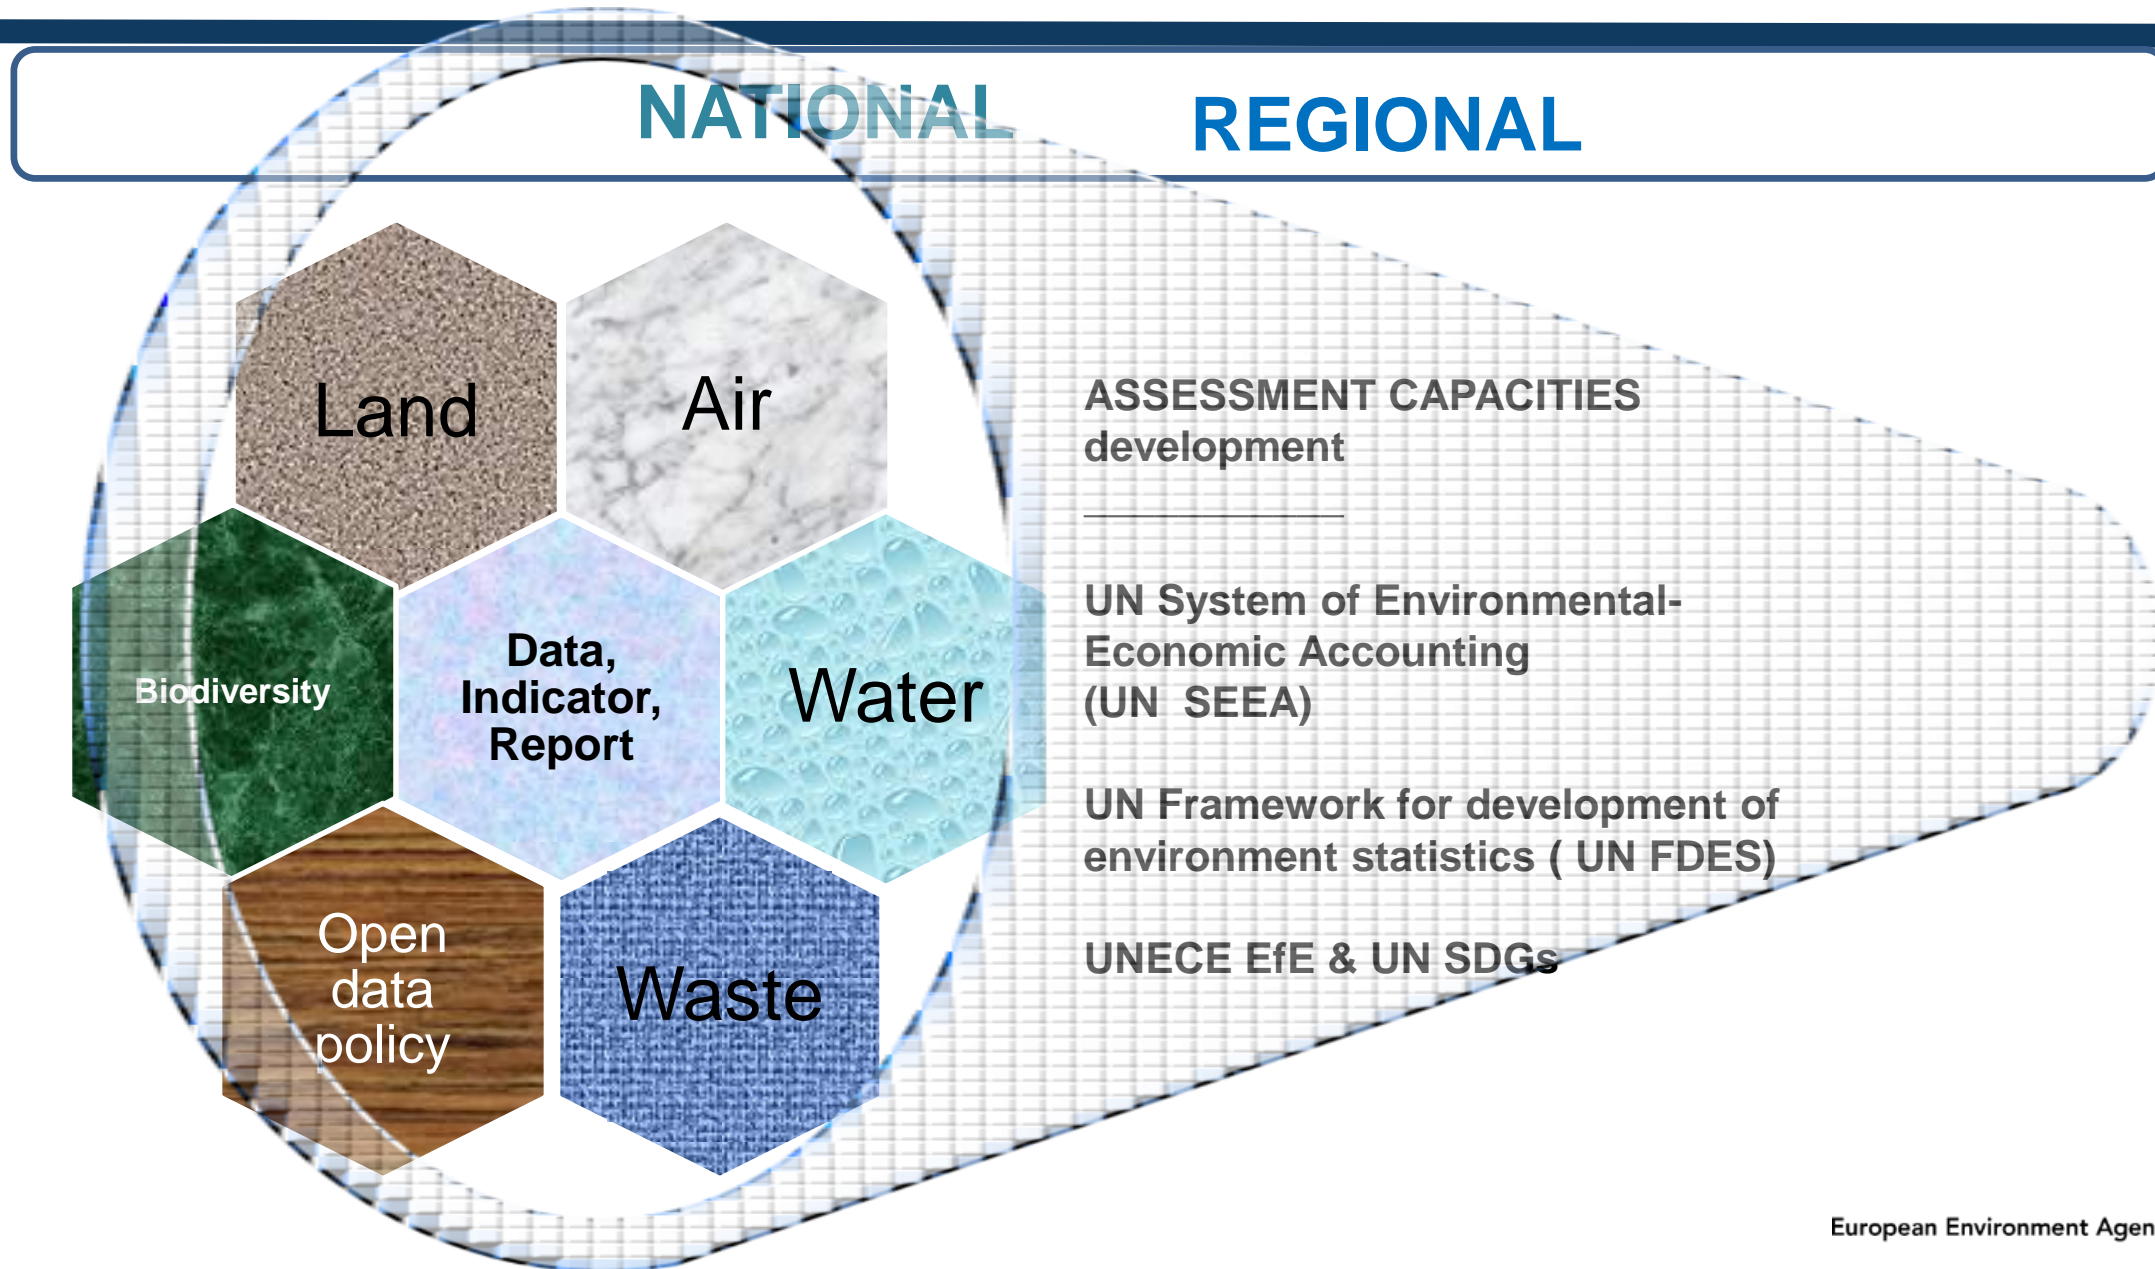

- Component implemented by Eurostat
- Aimed to support capacities in the national administrations to produce, manage and report waste data and statistics
- Improve the quality of waste data and statistics, available to and accessible for decision-makers, civil society, and other national and international stakeholders
- Increase the comparability of waste statistics and indicators from the six beneficiary countries
  - [Country Factsheets](#) (2018) – in line with reporting to UNSD questionnaire
  - [Regional Validation Report](#) building on the pilot data sharing exercise.

This project is funded by the European Union.

# Reporting on state of environment activity

- Sharing EEA/Eionet practices and experience – in close collaboration with the experts from the Slovak Environmental Agency (SEA)
- In support of the regular production of environmental indicators (UNECE set) as a basis for good environmental governance

## The project's achievements cover:

- Methodological guidance on State of Environment Report
- Six country briefing on State of the environment reporting
- Capacity building and regional workshops covering more than 200 experts during the 2017-2019 period
- EEAcademy summer schools and SOER trainings with hands-on exercises in 2018-2019

This project is funded by the European Union.

# Environmental accounting – in cooperation with CIRAD, 2017 & 2019

European Environment Agency

# Open Data and e-Government for Environment

- Key objective: to develop a Roadmap and identify feasible and practical means for **integrating environmental information in national e-governance/Open Data** processes and platforms.
- Six **Country Maturity Reports** on sharing and dissemination of environmental information, identifying: (i) challenges related to E-government and Open Data initiatives and environmental information management and sharing, and (ii) National Roadmap for implementation
- **Good practices on open data and e-governance report** for fostering environmental information sharing and dissemination

## *Alignment with EEA data policy and current initiatives in EU:*

- ✓ **Open Data Maturity in Europe**
- ✓ **Streamlining environmental reporting**
- ✓ **EU EIS project (Action 5): Promote best practices for European and national Environmental Information Systems**

Close cooperation and link with activities under work of UNECE Aarhus Convention and Protocol on PRTR

# Visibility and Communication across the board

- ✓ *Close cooperation with other EU-funded projects, EC and EU Delegations*
- ✓ *Online announcements of project events*
- ✓ *Press releases on project activities, articles in the UNSD Newsletter, videos on EEAcademy summer schools*
- ✓ *Link to published national articles*
- ✓ *Project-tailored communication workshops at national & regional scale*
- ✓ *Biannual project newsletters*
- ✓ *Great commitment and support!*

European Environment Agency

Issue 2019/6, Summer 2019

Implementation of the Shared Environmental Information System (SEIS) principles and practices in the ENP East region to Eastern Partnership Countries

Regional View | Country Perspectives | Upcoming Events

EN RU

## Regional View

**Renewed commitment to share environmental information across pan-European region**

Geneva, 30 January 2019

The executive heads of the United Nations Economic Commission for Europe, the European Office of the United Nations Environment Programme and the European Environment Agency met to discuss opportunities in environmental monitoring, reporting, assessment and strengthening networks.

[Read more](#)

© UNECE

**Integration of environmental information into national e-governance, open data frameworks and platforms**

Kyiv, 5-6 March 2019

The regional seminar kicked off discussions to find practical ways of integrating environmental information in national e-governance/open data frameworks and platforms, in particular the accessibility and role of these in sharing information and providing additional environmental, social and economic benefits.

© EEA

**EEA contributes to the joint OECD/UNECE Seminar on System of Environmental Economic Accounting**

Geneva, 20-21 February 2019

The fourth seminar served as a knowledge and experience sharing platform on the system of environmental and economic accounting (SEEA). Participation of the Eastern Partnership countries was covered by the ENI SEIS II project.
