Data and Information Dissemination of National Environmental Agency

NATIONAL ROUNDTABLE ON OPEN DATA AND E-GOVERNMENT FOR THE ENVIRONMENT IN GEORGIA

13 June 2019

National Environmental Agency

Department of Environmental Pollution Monitoring

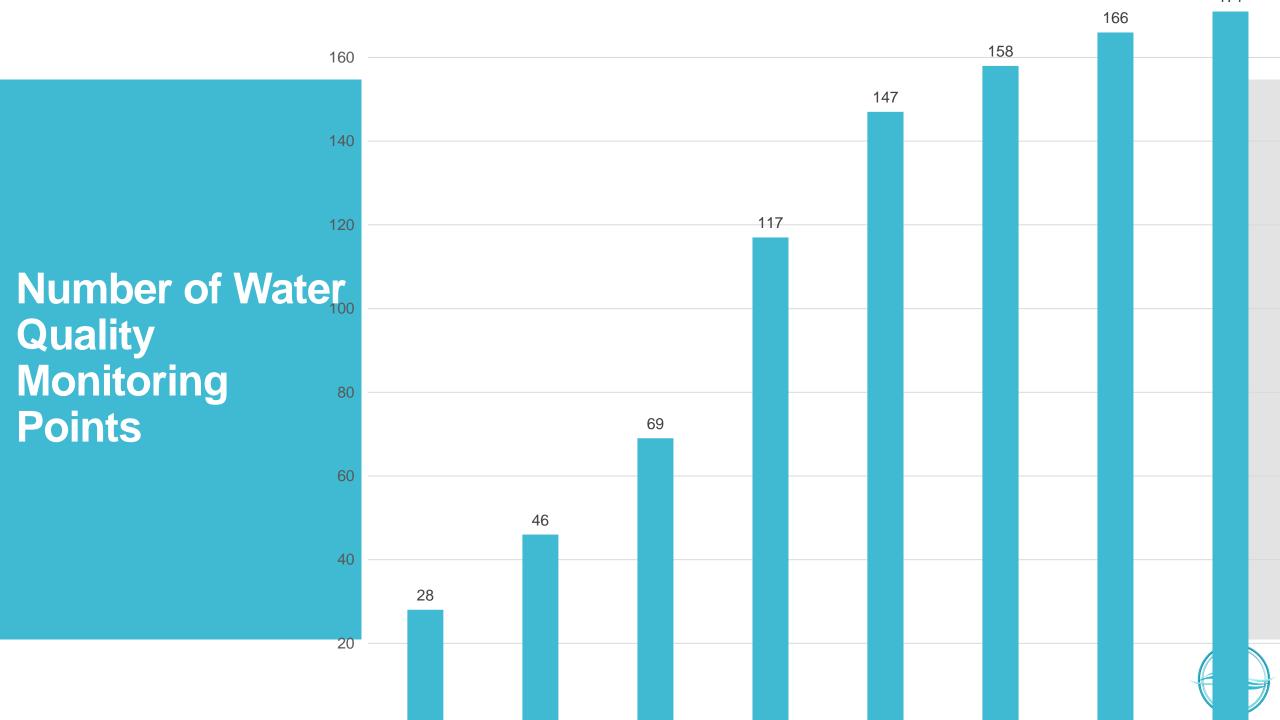

- Identification of different levels of pollution caused by anthropogenic factors, regular monitoring of atmospheric air pollution, water pollution, atmospheric precipitation pollution, chemical pollution of the soil and radiation pollution through observation points and field expeditions;
- ➤ Participation in the activities, concerning identification of extremely high environment pollution (including pollution caused by accidents);
- ➤ Preparation of yearbooks, bulletins, reviews, notes and other materials consisting of actual information on environment pollution.

Environmental Pollution Monitoring

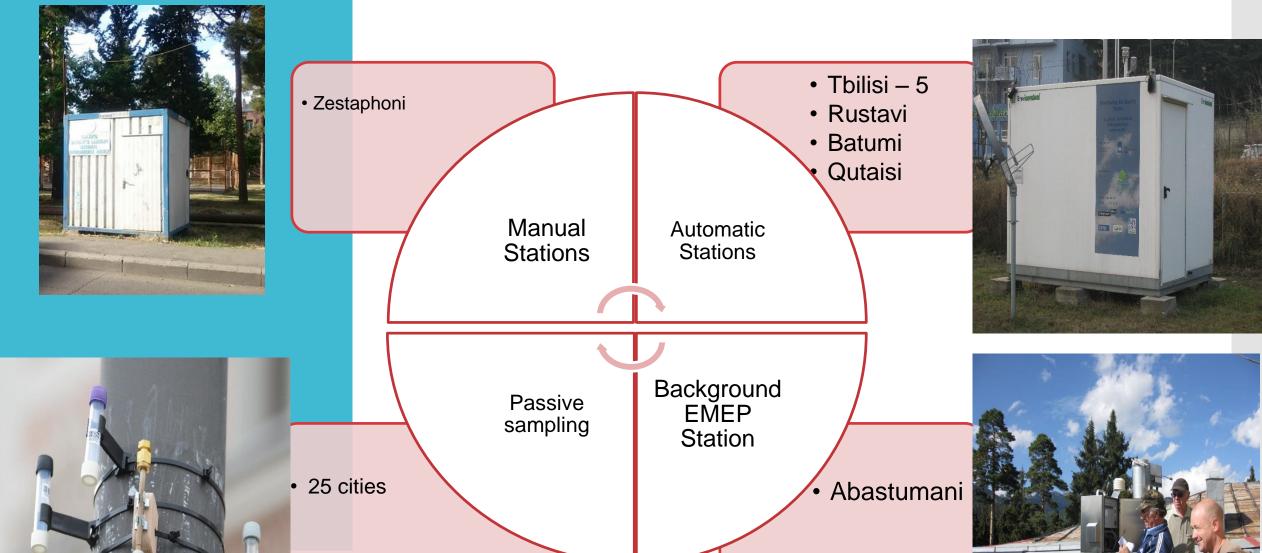

Measured Parameters

- Physical-chemical parameters, main ions, biological oxygen demand, pH, heavy metals, organic pollutants;
- In some samples microbiological pollution (total coliforms, E.coli and fecal streptococcus);
- In some rivers hydrobiological (macro invertebrates) surveys.

Air Quality Monitoring Network

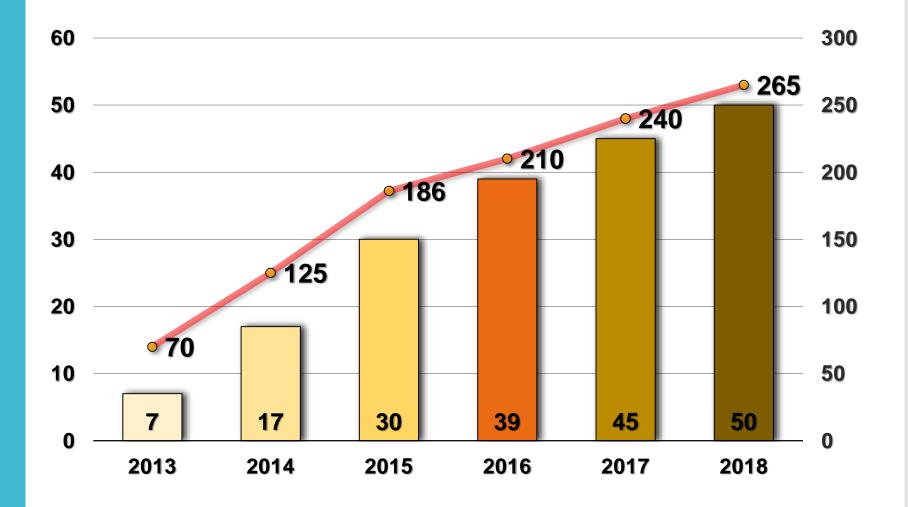

Pollutants monitored on air quality monitoring stations

- Automatic stations: PM10, PM2.5, SO2, NO2, NO, Nox, O3, CO;
- Manual stations: dust, SO2, NO2, NO, CO, O3, MnO2, Pb;
- ➤ Passive sampling: NO2, SO2, O3, C6H6.

Soil Monitoring Points and number of samples

Radiation Monitoring – Early Warning System

- 7 automatic stations;
- 7 manual stations

Sampling

LABORATORY

Data and Information

	Daily	Monthly	Quarterly	Annual
Bulletin on air quality data	365			
Bulletin on radiation information	365			
Bulletin "Brief Overview of State of Environment of Georgia"		12		
Results of Passive Sampling			4	
Annual Report on Air Quality				1
Annual Report on Water Quality				1
Annual Report on Soil Quality				1
Annual Report on Radiation Information				1
