Regional work plan 2017-2020 ENI SEIS II East project (version November 2018, updated after 3rd Steering Committee meeting)

Description of Action and regional priorities			Activities			201	.7	Т	2018			2019			2020*	
Activity area	Objectives	Activity types	Regional implementation	2019-2020	Expected outputs/deliverables	Q1	Q2 (Q3 ()4 Q	1 Q2	2 Q3	Q4	Q1 (Q2 Q		Q1 Q2
1.1: Support to national capacities to respond to international commitments in	Aggregate and align datasets for international use, and to respond to regional/international commitments	 Technical assistance through expert visits for harmonising data with international standards and the Water Framework Directive; Regional event(s) for sharing knowledge and experiences on data harmonisation 	REG- 1.1.1 Water • WFD and water ecosystem- based management • Water resources & efficiency/water accounts • WISE - data flows and information structure	 REG- 1.1.1 Water Developing country fact sheets based on standadised water indicators produced by the countries - as contributions to national state of water reports and/or water chapters of national state of the environment reports Technical developments of national Water Information Systems and/or water component of Intergrated Environmental Information systems; data flows and information structure (links to Activity 2.1) Regional integration of infomation on the state of waters in Eastern Europe and the Caucasus Region 	 Water indicators (C1-C5, C10-C11) as contributions/chapters to national state of water reports based on standadised regional approach and published online on national sources; Regional integration of state of water report as a contrinution to the regional/global policy process, targets and assessment 											
		 Scientific evaluation seminars on Emerald Network Sites; Support to national capacities to respond to reporting on the conservation status of species and habitats of European importance to the Bern Convention by 2019 	REG- 1.1.2 Biodiversity ■ D1. Protected areas	REG- 1.1.2 Biodiversity Supporting the first execise of data reporting to the Emerald Network under Resolution No. 8	 Improved coverage of Emerald sites as response to the Aichi Startegic Goal C target 11 and SDG Goal 15; Improved capacity to report data on species and habitats; Production of regionally comparable biodioversity indicators in accordance to EEA and UNECE. 											
		Technical assistance related to implementation of EU Air Quality Directives and the management of air quality data and information	REG- 1.1.3 Air Quality ■ Increasing the use and public accessibility of air quality measurement data	REG- 1.1.3 Air Quality • Evaluating the status of air quality data monitoring and management in each country to assess the feasibility of, and identify practical steps for, producing and sharing a near-real time Air Quality Index	 Country fact sheets on status of air quality monitoring and data management; Some tested practical cases applying the EU Air Quality Index methodology 											
1.2: Harmonisation of methodologies for production of comparable environmental indicators across the region	Technical assistance to develop a common approach applying the UN System of Environmental- Economic Accounting (UN SEEA)	REG- 1.2: Harmonisation of methodologies for production of	REG- 1.2.1 UN SEEA Vocational training and seminar on UN SEEA	 See outputs 1.1 (water accounts as part of water quantity indicators) Annual progress report on implementation of regional environmental indicators; 												
		Regional events with other EU/regional/international partner organisations on data harmonisation and regional envirionmental indicators	comparable environmental indicators across the region	REG- 1.2.2 Supporting a common approach with UNECE and UNEP for the estabishment of a SEIS Assessment Framework	 Common approach with UNECE and UNEP to support the development of a SEIS Assessment Framework as a response to the 2016 Environment for Europe Ministrerial Declaration (Batumi Declaration) 											
	Support the capacity building for developing indicator management systems	Hands-on training on tools and systems	REG- 2.1: Expert assistance and capacity building on e.g. developments of the Water Information System for Europe (WISE), the Biodiversity	REG- 2.1.1 Terms of Reference to mobilise resources and expertise for technical developments as appropriate and based on countries interest and commitments (primary focus on water, biodiversity and air components) - <i>links with Activity</i> 2.4	 Established data flows to gradually be aligned with the reporting obligations Technical documents tailored to country needs (i.e data dictionary, indicator templates, etc) 											
		Regional events for sharing knowledge and experiences on infrastructure and QA/QC	Information System for Europe (BISE) and an Air Quality Index, and supporting infrastructure	REG- 2.1.2 Regional events for the development of national roadmaps for integrating environmental information into national e-governance /open data processes and platforms- <i>links</i> <i>with Activity</i> 2.5	 Open Data Maturity Report for each country Preparation of a generic road map that can be further tailored to the specific needs of each EaP country during the regional meeting 											

*Subject to the 6-month project extension (beyond January 2020)

2.2: Support the development of inter-institutional dialogue and	Establish and formalise a networking structure that approximates working practices of Eionet	Training of the SEIS National Implementation Teams (NIT) on Eionet practices	REG- 2.2: Support the Im development of inter-institutional dialogue and public participation in the environmental decision-making process Improvemental RE	needed, relevant and feasible, regular meetings of SEIS National	 Inter-institutional and multi-stakeholder working groups established and operational; SEIS and Eionet concepts embedded in national strategies 			
public participation in the environmental decision-making process		Participation of key NIT members in relevant Eionet activities		REG- 2.2.2 Agenda points on ENI East cooperation in Eionet events and activities, as relevant				
	Civil society involvement	Working meetings/visits to the partner countries		REG- 2.2.3 To be confirmed, based on commitment of countries				
2.3 Pilot on extending CORINE Land Cover (CLC) methodology to capital areas of the partner countries	Capacity building on Corine land cover methodology (CLC)	Training of the CLC methodology	REG- 2.3: Pilot on extending CORINE Land Cover (CLC) methodology to capital areas of the partner countries	technical specifications	 Comparable data layers over pilot areas of CLC and CLC change over a period of time: Comparable data as input for regional land- related indicators (e.g. land uptake) 			
		Regional event(s) for sharing knowledge and experience on integration of CLC database		REG- 2.3.2 Explore synergies and interactions with the Eionet network for National Reference Centres on Land Cover	 Proceedings of the regional events; Training package updated and proposals for future possible actions 			
2.4: Implementation of national pilot projects demonstrating	Support the implemetation of the Monitorin-Data-Indicators- Assessment-Knowledge chain (via e.g. WISE and BISE, see Activity	Expert support at national level for the various MDIAK components	REG- 2.4: Implementation of National Environmental Information System demonstrating data sharing and integration R U E A T	REG- 2.4.1 In accordance with national priorities, interest and commitment, the EEA to identify and propose, case-by-case, functional and practical options to support the implementation of national actions , fully respecting contractual procedures.	 Website pages and/or online services operational 			
	2.1)	Regional event(s) for sharing Eionet knowledge and experiences on indicator development		REG- 2.4.2 Synergies with the UNECE Working Group on Environmental Monitoring and Assessment (WGEMA) and Joint Task Force of Envionmental Statistics and Indicators (JTFESI)	Examples of online indicator development			
	d information into national e-	Expert support at national/regional level. Synergies with the implementation of the Aarhus	REG- 2.5: Expert assistance to facilitate regional dialogue for sharing knowledge and experience around data management, access and use	open data (Open data maturity reports based on EU model for	 Draft Open Data maturity reports for each country Network of relevant institutions/experts in each country to be involved in the environmental dimension of e-governance and Open Data and to assist the further implementation of the agreed road map 			
				the preparation of a generic road	 Generic road map that can be further tailored to the specific needs of each country 			
				(round tables) to agree on generic road map and practical means for intergrating environmental information into national e- governance /open data processes and platforms	 National draft roadmap/checklist for closing common gaps between environmental information providers and national e-governance set-ups; Tailor-made priority actions/pilots identified for each country and concrete steps towards implementation: Compendium of best practices from national cases for experience sharing 			

3.1: National training and expert assistance on SOER production based on SEIS-compliant data Develop training programmes to build national capacities for producing state and outlook on the environment reports (SOER) Expert visits and missions (to partner and/or Eionet countries) REG- 3.1: National training and expert assistance on SOER production, based on SEIS- compliant data REG- 3.1: National training and expert assistance on SOER production, based on SEIS- compliant data REG- 3.1: National training and expert assistance on SOER production, based on SEIS- compliant data REG- 3.1: National training and expert assistance on SOER production, based on SEIS- compliant data REG- 3.1: National training and expert assistance on SOER production, based on SEIS- compliant data REG- 3.1: National training and expert assistance on SOER production, based on SEIS- compliant data REG- 3.1: National training and expert assistance on SOER production, based on SEIS- compliant data REG- 3.1: National training and expert assistance on SOER production, based on SEIS- compliant data REG- 3.1: National training and expert assistance on SOER production, based on SEIS- compliant data REG- 3.1: National training and expert assistance on SOER production, based on SEIS- compliant data REG- 3.1: National training and expert assistance on SOER production, based on SEIS- compliant data REG- 3.1: National training and expert assistance on SOER participation at the 2019 EEAcademy Summer School on National core set of environmental indicators - I
