

## Brief Curriculum Vitae

National SEIS Assistant for Armenia in the ENI SEIS II East project since April 2018.

Previously Yurik worked as the National Coordinator of Armenia within the of European Environmental Agency ENI SEIS projects.

He has over 38 years of experience in ecological policy, program and expert activities, ecological and statistical information system management.

During his 18 years of work in the position of the Member of State Council on Statistics he completed the environmental statistical registration system and updated all reporting forms and indicators. The complete introduction of SEIS fundamental requirements and principles in Armenia was one of the main principles of his work. He coordinated and supported the formation and uninterrupted activities of administrative information systems of environment within the Ministry of Nature Protection of RA, Ministry of Emergency Situations of RA, State Water Committee of RA, “Haypethidromet” Service, “Hayantar” Committee and other government and commercial structures.

He manages the bilingual (Armenian and English) integrated environmental publications that exist for over 20 years, including the extended statistical reports and and in recent years,as brochures <http://www.armstat.am/en/?nid=81&phtid=env&year=2017&submit=Search>

Yurik has designed and managed the maintenance of separate internet web page for the complete environmental statistical information, in accordance with the SEIS requirements <http://armstatbank.am/pxweb/en/ArmStatBank/?rxid=002cc9e9-1bc8-4ae6-aaa3-40c0e377450a>

A procedure was established within the Government of RA and governing bodies to base on relevant official publications of the Statistical Committee of the Republic of Armenia for the development of all program work, analytical reviews, reports that are available at the official website of the Statistical Committee of the Republic of Armenia and are accessible for all users. Being a Member of the Steering Committee for National and Sectoral Reports that is mainly dealing with environmental issues of Armenia, he has always promoted the widespread use of official environmental statistical information.

He coordinated the work of the Intergovernmental Commission of the Government of RA on the implementation and evaluation of the principles of green economy and sustainable development, and is the co-author of forming and maintaining the “Armenia - Sustainable Development, Statistical Platform” (<http://www.armstat.am/en/?nid=655>). As an example of multiple use of environmental statistical information, it is worth mentioning his new approach for calculating the quantitative index of human sustainable development developed by a group

of Armenian scientist-experts led by him. Among other social-economic additions, it included environmental factor as a new and fourth component for calculation of sustainable development. It was presented during Rio+20 by the support of UNDP experts, received a positive feedback and was accepted as “Armenian version”.

Yurik includes the SEIS topics in his lectures in scientific-educational institutions that study environmental information management and he is actively involved in the development of legal normative materials and various decisions concerning the environmental sphere.

In the meantime, among the functions entrusted to the assistant, it is also emphasized the implementation of works related to eco-portal formation and sustainable management in Armenia.
