# Introduction

- The General Department of Environmental Statistics at CAPMAS was established since 2007. Since then, it issues an annual report tackling various environmental statistics of the Arab Republic of Egypt.
- The report is composed of 5 main sections which are:
  - 1) Air quality statistics.
  - 2) Water quality statistics.
  - 3) Waste quality statistics.
  - 4) Biodiversity statistics and land use.
  - 5) Weather and Climate change.

# Aims and Objectives

- Providing of environmental data and statistics to planners, researchers and decision makers and those interested in the environmental field .
- Spreading environmental awareness to all social and cultural levels.

# Tasks and Activities

Providing various statistical data within the environmental context such as:

- 1) Environmental indicators and sustainable development package.
- 2) Publishing an annual report on environmental statistics.
- 3) Preparation of studies and surveys in the environmental field (under-construction).
- 4) Providing data on environmental pollutants according to types and sources as CO<sub>2</sub>, SO<sub>2</sub>, NO<sub>2</sub>, lead...etc.)
- 5) the data required to international and national organizations .

# Tasks and Activities (Cont'd)

- 6) Participating in environmental workshops and global conferences
- 7) Preparing the environmental indicators for publication on the website (<http://www.capmas.gov.eg/> )
- 8) Archiving the report , database in the website of [CAPMAS](http://www.capmas.gov.eg/).
