

# Group 3

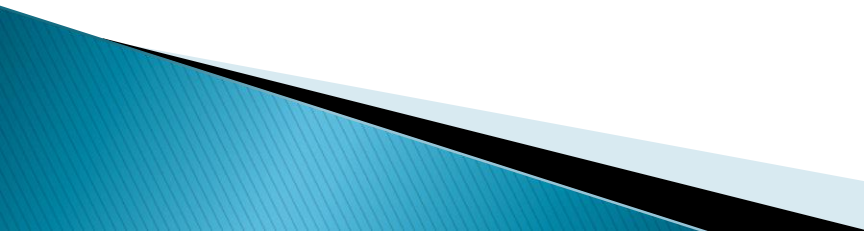

Albania, Lebanon, Palestine  
Claudette, Stavros

What is the progress in depolluting the Mediterranean?

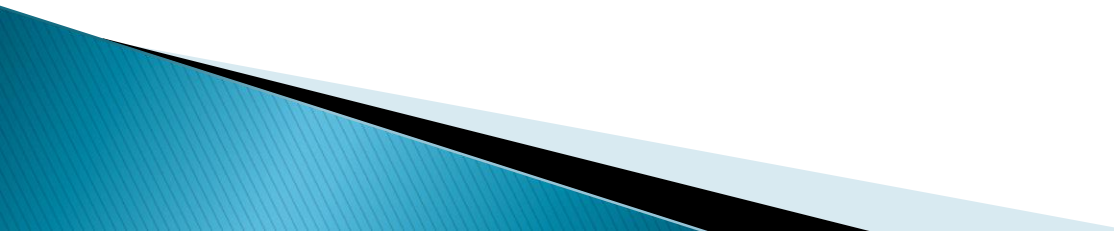

# Which analytical framework should be applied (DPSIR, PSI, thematic, etc,)

- ▶ On the country level assessment, we follow the thematic analytical framework, with an additional cross cutting evaluation and focus on the national policy agenda
  - ▶ On the regional level assessment, we follow the DPSIR framework
- 

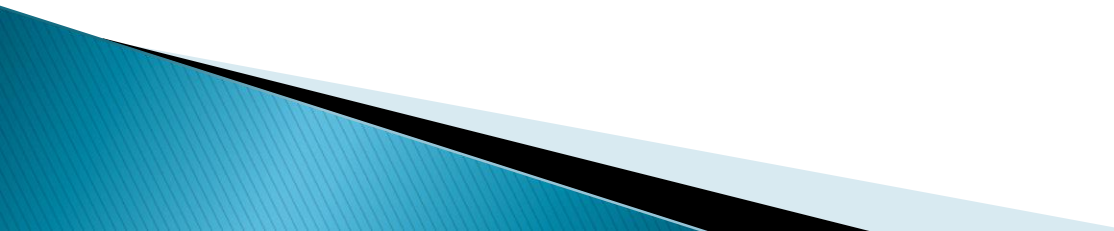

# What should be the main headings?

- ▶ An additional summary on report 2014 need to be included in the 2019 report
  - ▶ A heading on marine litter and hazardous waste
  - ▶ Under industrial emissions, more focus is recommended for POPs and Mercury
  - ▶ A forward vision/looking could be added to the 2019 report with link to SDG goals and MSSD
- 

# What is the best format?

- ▶ The regional report could be mainly web based with a summary produced in paper
  - ▶ The national assessment reports could be produced in paper and web based
- 

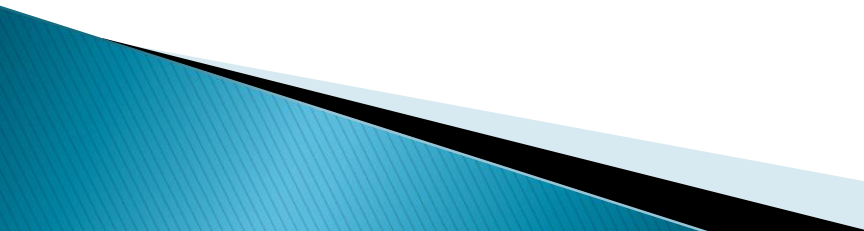

# Should it be country specific or regional

- ▶ The regional report could keep its original format/structure with additional one page/factsheet per country showing figures and achievements
  - ▶ The country level assessment will be in separate documents
- 

# Should the report comes as textbook or with visuals

- ▶ The report should include both text and visual illustration with more emphasis on infographic compared to 2014 report

# How to ensure proper visibility and dissemination

- ▶ Include the report on webages (organizations of national teams, ministries, EEA, UNEP/MAP,...), and social media
  - ▶ Launching events on the national level
  - ▶ Targeting stakeholders for outreach
  - ▶ Attractive dissemination material (brochures, press releases, videos,...)
  - ▶ Additional possibilities (electronic boards, TV spots)
-
