19 SEPTEMBER 2017 — WEBINAR
- ENI SEIS II South Support Mechanism Regional workshop on indicators  
17-18 MAY 2017 — PILESTRØDE, 61 — COPENHAGEN

#### VOLUME OF WASTEWATER COLLECTED, OF WHICH VOLUME OF WASTEWATER TREATED, INCLUDING TYPE OF TREATMENT

Add category Manage categories

The indicator refers to the volume of municipal wastewater collected by public sewage networks, septic systems and cesspits, and the volume of wastewater treated in wastewater treatment plants. Here reference is made to primary (mechanical) treatment that removes part of the suspended solids, and secondary (biological) treatment that uses aerobic or anaerobic micro-organisms to decompose most of the organic matter and retain some of the nutrients (around 20-30%). Tertiary (advanced) treatment removes the organic matter even more efficiently.

#### Availability of datasets for indicator calculation

Dataset	Availability
Volume of wastewater collected	😊
Volume of wastewater treated	😊
Type of treatment	😊
Use of treated water by type	😊

#### Governance for data collection

Administrative Level	Central administration
