

Small-Scale Funding Agreement “ SSFA ”

- Activities
- Objectives

SSFA Activity 2:

Support to develop and establish environmental information system .

Main Objectives

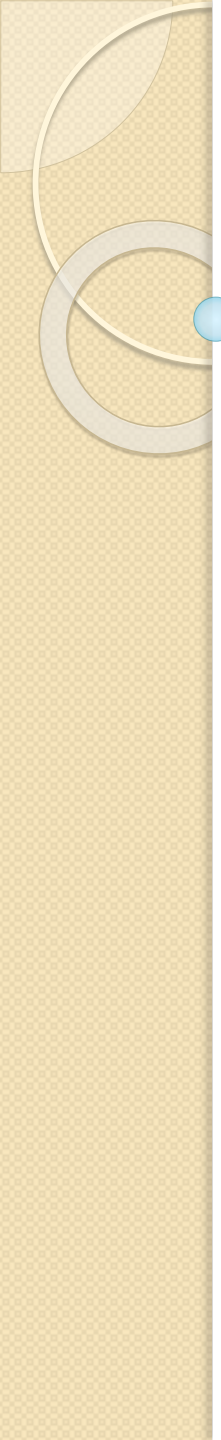

- **Enhance EQA Capacity & infrastructure (Equipment & Connectivity) to a fully operational one to address the national and international reporting obligations (such as MEDPOL infosystem/Reportnet).**
- **Develop/upgrade the SEIS prototype (mainly Software Development).**
- **Execute a beta testing and implementation the recommended changes with the improved/developed information system.**

Expected Results:

- **Needed infrastructure (Equipment & Connectivity) acquired and in place at EQA premises.**
- **SEIS (upgraded prototype or newly Developed) relocated to EQA .**
- **Roadmap for further operationalize the prototype.**
- **Reporting available data on indicators is possible (for example to infoMap system or Reportnet) .**

Linkage With International bodies and projects

- **An Operational National SEIS will contribute to reporting on the national, regional and international levels**
- **For example it will contribute to H2020 project (Results 2 & 3) .**

- 
- **R2: The in-country processes for organizing sharing of data sets underlying the H2020 indicators are stabilized.**
 - **R3: The infrastructure for reporting offered by the EEA ('Reportnet') and UNEP (UNEP/MAP Reporting Network) is more widely used.**
