BOOKLETS

These booklets gather a set of factsheets on the indicators reflecting different environmental issues and sustainable development in the Mediterranean basin.

The first set of "indicators" factsheets available concerns the follow-up of the implementation of the Mediterranean Strategy for Sustainable Development 2016-2025 in a draft version.

It will be followed by a booklet on the indicators of the blue economy in the Mediterranean realized within a project financed by the MAVA Foundation.

MONITORING THE IMPLEMENTATION OF THE MEDITERRANEAN STRATEGY FOR SUSTAINABLE DEVELOPMENT 2016-2025

The "indicator" factsheets of this booklet, carried out in the framework of the monitoring of the Mediterranean Strategy for Sustainable Development (MSSD), are intended to provide a first answer to the question: "Are the Mediterranean countries progressing towards sustainable development?".

The objectives of these factsheets are to have the MSSD 2016-2025 implementation monitored and evaluated on periodic basis through this agreed set of indicators in line with SDG and to be presented as a Mediterranean Sustainability dashboard to be adopted by the Barcelona convention COP 20 by the end of 2017.
