

H2020 Case study template

Introductory note

This case study template provides the main elements to be covered when developing country-specific examples that illustrate a particular issue, in the context of the Horizon 2020 Regional Assessment. The selected cases should illustrate a specific success story or challenge faced by your country, region, city/town, community to address a particular issue in relation to the H2020 priority areas (waste, water, industrial emission, cross-cutting issues) or SEIS pillars (content, cooperation, infrastructure). Case studies that consider more than one thematic and/or pillar are also welcome. Cases should be supported by data and other illustrations whenever possible and should serve to draw lessons learned.

Indicative length: 2-3 pages

Case study title	
Authors, affiliation	
Country	
Relevance to Horizon 2020 Initiative	<i>Identify which thematics (waste, water, industrial emission, cross-cutting issues) the case study addresses</i>
Relevance to SEIS implementation	<i>Identify which SEIS pillar (content, cooperation, infrastructure) the case study addresses</i>
Geographical location	
Summary of the issue	
Main results and outcomes	
Main challenges encountered	
Lessons learned/recommendations	
Sources of information	
Contact person
